SUPPORTS HEALTHY BLOOD PRESSURE, SLEEP AND STRESS/ANXIETY MANAGEMENT:

- Reduces stress levels and thus cardiovascular pressures (anti-anxiety).
- Relaxes nervous system.
- Beneficial in supporting healthy blood pressure levels.
- Does not cause the side effects associated with many blood pressure medications.
- Diastolic greater than 100 take 3 capsules in the morning and 3 before bedtime. Diastolic less than 100, one capsule in the morning and 2 in the evening.
- Tranquility may be taken with prescription medications, and monitoring of blood pressure is suggested by healthcare professional.
- Since Tranquility induces good sleep patterns, some people may experience some drowsiness or tiredness during daytime dose while attaining a reasonable blood pressure level.
- An estimated 103 million U.S. adults have high blood pressure, according to new statistics from the American Heart Association.
- Opting not to use potentially dangerous and synthetic drugs to treat high blood pressure isn't an excuse to ignore the problem. In fact, ignoring high BP can lead to devastating consequences.
